github.com/sben-chi

Backend developer specialized in **Java and Spring**, with hands-on experience building backend systems for an electronic payment platform. Comfortable working with databases, multi-threading, and system design. Focused on writing clean, reliable backend code and continuously learning new tools and technologies.

Professional Experience

Software Developer Intern

M2M Group (Electronic Payment Solutions)

Nouaceur, Morocco

10/2024 – 04/2025

- Developed and integrated new features into the **Mx Payment IHM** platform.
- Built and maintained backend services using **Java, Spring, and Hibernate**.
- Implemented frontend interfaces using JSF and PrimeFaces.
- Optimized SQL queries for **Oracle** and **MySQL** to improve system performance.
- Collaborated within enterprise workflows (code reviews, **GitLab**, issue tracking)

Web Developer Intern

Casablanca Booking Company

Casablanca, Morocco

05/2021 – 07/2021

- Developed a dynamic company website and integrated social media APIs.
- Ensured cross-browser compatibility and improved client engagement.

Technical Projects

Real-time Chat Application

Java, Spring JDBC & Multi-threading

- Built a multi-threaded client-server system with **Java Sockets** for real-time messaging.
- Added secure sign-up and login with **BCrypt** password hashing.
- Connected the app to **PostgreSQL** with **Spring JDBC** and **HikariCP** for high-performance data persistence.
- Designed a JSON-based protocol to handle broadcasting and many users at the same time.

Log Analyzer CLI

Java, Picocli, Jackson & Regex

- Built a CLI tool to parse and analyze **structured application logs** using **Picocli**.
- Applied the **Strategy Pattern** to generate JSON, Markdown, and console reports.
- Optimized log processing using **Java Streams**, **Regex**, and **Jackson**.

Pong Web App

Full-Stack: NestJS & React · Group Project

- Developed a real-time single-page application allowing users to play and chat.
- Implemented **OAuth** and **Two-Factor Authentication (2FA)** for security.
- Created a friend management system and live leaderboards to track user statistics.

DevOps Infrastructure

Docker & Virtualization

- Set up a multi-container infrastructure using **Docker** and **Docker Compose**.
- Configured NGINX as a reverse proxy for WordPress and MariaDB containers.
- Set up persistent storage and secure networking between containers.

Technical Skills

Backend & Databases: Java (Spring, Spring Boot), Hibernate, JPA, RESTful APIs, PostgreSQL, MySQL, Oracle SQL	DevOps & Tools: Docker, Docker-Compose, Ansible, Kubernetes (K3s), Vagrant, Git, GitLab, Maven
Frontend: HTML5, CSS3, JavaScript, React, JSF (PrimeFaces)	Core Concepts: Microservices-based Architecture, Multi-threading, Object-Oriented Programming

Education

Digital Technologies Architect

1337 – UM6P (42 Network)

Ben Guerir, Morocco

2021 – Present

University Diploma in Computer Science

Higher School of Technology (EST)

Casablanca, Morocco

2019 – 2021
